BENJAMIN HAN

benjaminhan830@gmail.com | (360) 931-0455 | Seattle, WA | linkedin.com/in/benjaminhan830 | bhan830.github.io

SKILLS AND QUALIFICATIONS

Quality and Compliance: Complaint handling and investigation, nonconformance investigation and reporting, root-cause analysis, CAPA, quality data trending, internal audits, SOP development, documentation control, ISO 13485, ISO 9001
Programming and Software: Python, MATLAB, R, SQL, Java, Visual Basic for Applications, HTML, CSS, Git
Engineering and Data Tools: Tableau, Fusion 360, AutoCAD, LabVIEW, COMSOL Multiphysics, Onshape, SolidWorks

WORK EXPERIENCE

Jr. Quality Engineer *September 2024 – Present*
Bio-Therapeutic | Seattle, WA

- Managing customer service and investigating customer complaints on product issues, contacting customers directly and creating RMA/CCR records to drive each case to closure
- Investigating nonconforming products and developing nonconformance reports to support disposition decisions
- Analyzing quality, procurement, and customer service data, including complaints, to identify continuous improvement opportunities and inform management decisions
- Conducting routine surveillance audits to verify compliance with internal quality standards and SOPs
- Building three interactive Tableau dashboards integrating 1,000+ purchase and supply records for quality reporting
- Automating customer service logging and reporting workflows in Excel/VBA, reducing manual data entry

Graduate/Undergraduate Lead Teaching Assistant *January 2024 – June 2026*
UW Bioengineering Department | Seattle, WA

- Strengthened student understanding of MATLAB programming and bioengineering design concepts by working with instructors to develop course materials, revise online modules, and lead undergraduate lectures
- Supported academic success through holding 150+ office hours and mentoring eight student engineering teams

Engineering Services Intern *September 2024 – June 2025*
UW Facilities | Seattle, WA

- Organized and maintained large structured datasets (190k+ records) of University of Washington building schematics, safety documents, and engineering records to improve data consistency
- Streamlined data entry workflows by developing a Python script to automate logging and metadata extraction
- Established tagging procedures for metadata information to support efficient document retrieval

SummerWorks Engineering Intern *June 2023 – August 2023*
City of Portland Bureau of Environmental Services | Portland, OR

- Improved accessibility of engineering records by designing a VBA-based tool managing 500+ pipe data entries
- Reduced manual engineering calculations by implementing Excel-based automation for pump curve analysis

TECHNICAL PROJECTS

WiseFind: Medical AI Platform for Neurotrauma Assessment *September 2025 – Present*
University of Washington | Seattle, WA

- Designed and validated a data processing and testing pipeline for a clinical query system, securing $55,000 in funding from ITHS and the UW Department of Neurosurgery
- Developed a synthetic query generation system that expanded LLM evaluation coverage, simulating realistic usage
- Ensured project continuity and onboarding efficiency for new project members by maintaining detailed documentation and standard operating procedures (SOPs) for ongoing AI platform development

WiseSpine: Image-Focused AI Agent for Spine MR/CT Analysis *November 2025 – Present*
University of Washington | Seattle, WA

- Developed a Python-based spine reconstruction pipeline for automated Cobb angle measurement
- Built a segmentation benchmarking system for medical imaging using spatial analysis and quantitative metrics

CareChorus: Patient-Centered Care Navigation App *March 2026 – June 2026*
University of Washington | Seattle, WA

- Validated an AI-driven mobile application designed for patient treatment navigation across healthcare systems
- Designed an evaluation pipeline in Dart to benchmark classification and data extraction of medical documents

EDUCATION

Master of Applied Bioengineering
University of Washington | Seattle, WA | Graduated June 2026 | GPA: 3.94

B.S. Bioengineering: Data Science | Minor: Applied Mathematics
University of Washington | Seattle, WA | Graduated June 2025 | GPA: 3.47
